

A clearer, brighter future with Laser Vision Correction.

Would you like to see clearly?

Laser Vision Correction is a safe, proven, efficient and effective opportunity to invest in your lifestyle permanently.

It offers the following lifestyle benefits:

- + Vision freedom
- + Lifestyle convenience
- + Independence from glasses & contact lenses
- + Confidence in appearance

Adelaide Eye & Laser Centre, a leading ophthalmic practice, was the first to offer Laser Vision Correction in South Australia.

With a truly patient first focus, your eye health, well-being and visual results are our priority.

Are you suitable?

Not everybody is suitable for Laser Vision Correction, but with technology advancements, more and more people can now invest in this life-changing opportunity.

Why choose Adelaide Eye & Laser Centre?

As the first to offer Laser Vision Correction in South Australia, and priority access to a complete suite of state-of-the-art laser technology including SMILE® Pro, LASIK and PRK, Adelaide Eye & Laser Centre is able to provide a comprehensive and individually tailored laser solution.

Dr Ben LaHood and Dr Peter Ingham are Laser Vision Correction specialists. Both are globally regarded as leaders in this field, with specialised expertise and extensive experience in laser solutions. Their exceptional skill, paired with an investment in technology, provides the opportunity to achieve the very best visual acuity results.

Adelaide Eye & Laser Centre is located on Level 1 of Adelaide's premier ophthalmic treatment precinct and enjoys priority affiliation with ParkView Day Surgery, located in the same building. As a result, **Adelaide Eye & Laser Centre is the only centre in South Australia to conduct Laser Vision Correction in a fully accredited theatre environment** providing the convenience of having both consulting and surgery in the same central location.

With a patient first focus, exceptionally skilled clinical and surgical staff, and state-of-the-art facilities and technology, Adelaide Eye & Laser Centre is the number one choice for Laser Vision Correction. Centrally located, with ample undercover parking and direct lift access, it offers excellent convenience and accessibility.

Is it time to own your vision?

To get started take our Online Eye Suitability Test at www.aelc.com.au or we invite you to speak to one of our friendly Laser Vision Counsellors about your suitability and what option would suit you best on **08 8274 7000**.

*Is it time to
own your vision?*

Take the first step to find out! It's easy, complimentary, and convenient!

Adelaide Eye & Laser Centre has developed the **Online Eye Suitability Test**.

It's available at www.aelc.com.au as your first easy, quick and convenient step to visual freedom.

Completed from your own phone, tablet, or computer, in three quick questions it will help to determine your suitability and what your best options are.

Alternatively, please don't hesitate to contact the centre via phone on 08 8274 7000 and one of our friendly customer service staff can assist your enquiry.

Pre-assessment appointment via Zoom or at our centre

Conducted in-person or over Zoom, depending on your preference, during this complimentary consultation one of our Laser Vision Counsellors will:

- + Discuss potential options suited to your prescription type and lifestyle
- + Provide information about what to expect on the day of your procedure
- + Recovery and post operative information
- + Provide you with the opportunity to ask any questions you may have

After this appointment the next step is to arrange a clinical assessment where tests are performed and your suitability discussed with your doctor.

Your investment

Laser Vision Correction is a permanent and significant investment in your future lifestyle. Depending on your individual suitability and recommended option, Laser Vision Correction starts from \$2900 per eye, inclusive of pre and post operative care, and appointments.

Our payment options and plans help to provide you with the opportunity to achieve this lifestyle goal in a financially responsible way. Please don't hesitate to enquire with a member of our friendly customer service team.

Our Laser Vision Correction specialists

Dr Peter Ingham and Dr Ben LaHood are both globally recognised experts in Laser Vision Correction and refractive ophthalmology. Our friendly clinical staff, and your chosen doctor, can assist you in determining the best option for your vision needs and lifestyle preferences.

Your Laser Vision Correction choices An overview of treatment options at AE&LC

Good unaided vision is something everyone wants, but not everyone has naturally. Glasses and contact lenses offer a solution, but they can be inconvenient and annoying.

Laser Vision Correction, and its modern technology advancements, now offers most people the opportunity to improve their eyesight and their lifestyle!

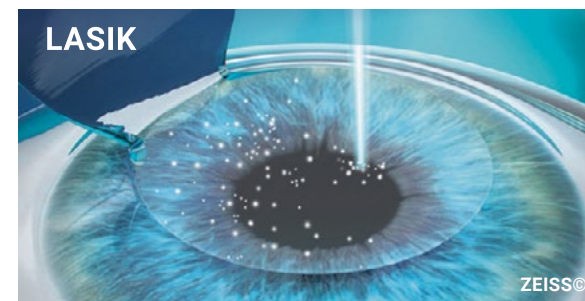

At Adelaide Eye & Laser Centre, we offer a complete suite of Laser Vision Correction technology including SMILE® Pro, LASIK and PRK. These different options are detailed below:

SMILE® Pro is the latest advancement in Laser Vision Correction technology. It can be used to treat shortsightedness and astigmatic prescriptions.

Benefits

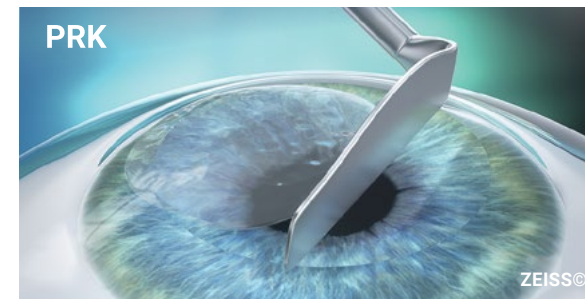

- + Minimally invasive procedure
- + Gentle treatment option
- + Fast visual recovery
- + Reduced risk and incidence of dry eye
- + Comfortable treatment experience
- + Quiet and odourless
- + Small incision and no flap or flap related complications

With its wide treatment range and fast visual recovery speed, LASIK is a proven and commonly performed Laser Vision Correction technology.

Benefits

- + Poses little or no post operative discomfort or pain
- + Quick visual recovery
- + Suitable for a wide range of prescriptions including longsightedness, shortsightedness and astigmatism
- + Proven technology as the treatment standard for 20 years

PRK was the first type of Laser Vision Correction and remains widely performed. It involves gently removing corneal tissue without creating a flap.

Benefits

- + Safe, efficient and predictable
- + Suitable for a wide range of prescriptions including longsightedness, shortsightedness and astigmatism
- + Visual outcomes are excellent
- + More suitable for patients with thin corneas
